~~Re: AB 2764~~

Re: Docket OOP-1211/CP1

Dear Commissioner Henney,

I am writing to convey my support for mandatory labeling of ALL genetically modified foods. To quote Prince Charles, "Are we going to allow the industrialization of life itself - redesigning the natural world for the sake of convenience?" I do not wish to eat foods that have been tampered with and would like a system in place which would allow me to make this choice for myself and for my patients.

I also support strict regulations for the testing of such foods. I feel we MUST have more data before unleashing these foods into the environment and our bodies.

Thank you.

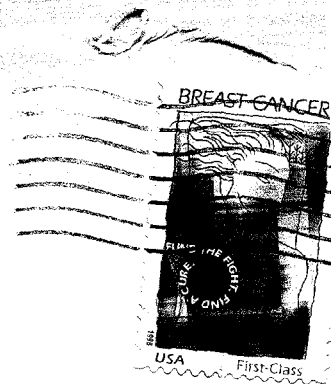

Sincerely,

Wendy Goodwin, L.Ac.
